ACCEPTED 25 JULY 1989

## APPENDIX

## LOCALITY REGISTER

The following localities are entered in the LACMIP locality register. They are in the Department of La Paz, Bolivia, except the last locality, which is in the Department of Cusco, Peru. All are in the Copacabana Limestone.

8648. "YA" section on Cerro Jacha Khatawi, approximately 2 km NW of the village of Yaurichambi, Department of La Paz, Bolivia. The traverse begins on the NE side of the hill, below the N peak, and continues over the summit and down the SW side to cover. The route is shown by Sakagami (1984, fig. 3) and the location of the hill in the NW¼ of section ¼<sub>8</sub>–¼<sub>5</sub> of the Carta Nacional Bolivia, 1:50,000, Penas, Hoja 5945 III, 1964, topographic map. Locality 8648 is 25–30 m above the base of the formation. Solitary and tabulate corals.

8650. Beds 10 m above locality 8648. Fusulinids, solitary corals.

8653. Beds 23–25 m above locality 8650. Solitary corals, brachiopods, starfish.
