

Plate 2

Selected common coral species recovered from the Late Oligocene Antigua Fm., Antigua. All scale bars are 1cm in length.

- Fig. 1: *Agathiphyllia tenuis* (DUNCAN, 1863), figured specimen, LACMIP 13142, specimen surface.
- Fig. 2: *Agathiphyllia hilli* (VAUGHAN, 1919), figured specimen, LACMIP 13143, thin section.
- Fig. 3: *Agathiphyllia* sp. 3, figured specimen, LACMIP 13144, thin section.
- Fig. 4: *Favites polygonalis* (DUNCAN, 1863), figured specimen, LACMIP 13145, thin section.
- Fig. 5: *Colpophyllia willoughbiensis* (VAUGHAN, 1919), figured specimen, LACMIP 13146, thin section.
- Fig. 6: *Antiguastrea cellulosa* (DUNCAN, 1863), figured specimen, LACMIP 13147, specimen surface.
- Fig. 7: *Hydnophora* sp. A, figured specimen, LACMIP 13148, thin section.
- Fig. 8: *Montastraea canalis* (VAUGHAN, 1919), figured specimen, LACMIP 13149, thin section.
- Fig. 9: *Montastraea endothecata* (DUNCAN, 1863), figured specimen, LACMIP 13150, thin section.
- Fig. 10: *Diploastrea crassolamellata* (DUNCAN, 1863), figured specimen, LACMIP 13151, thin section.
- Fig. 11: *Diploastrea* sp. T, figured specimen, LACMIP 13152, thin section.
- Fig. 12: *Heliopora* sp. A, figured specimen, LACMIP 13153, specimen surface.
